<table>
<tr><td>Use case</td><td colspan="3">Shift schedule visualization</td></tr>
<tr><td>Release (id)</td><td colspan="3">UC-13, v1.0, 26 April 2026</td></tr>
<tr><td>Context of Use</td><td colspan="3">Ticket inspectors can access to the system during their working hours or not to check their assigned shift in order to better plan their daily activities (FR25)</td></tr>
<tr><td>Scope</td><td colspan="3">Allow ticket inspectors to view their personal shift hours in an organized and clear way (train, time, routes, starting and ending place)(FR25)</td></tr>
<tr><td>Level</td><td colspan="3">Primary task</td></tr>
<tr><td>Primary actor</td><td colspan="3">Ticker inspectors</td></tr>
<tr><td rowspan="3">StakeHolder & interest</td><td colspan="2">StakeHolder</td><td>Interest</td></tr>
<tr><td colspan="2">Ticket inspector</td><td>Wants easy access to his assigned shifts</td></tr>
<tr><td colspan="2">Railway administrator</td><td>Wants inspectors to follow correctly any schedule to assure proper staff cover on trains.</td></tr>
<tr><td>Preconditions</td><td colspan="3">➔ Ticket inspector is logged in the system
➔ The shift schedule is been previously assigned and present on the database</td></tr>
<tr><td>Minimal Guarantees</td><td colspan="3">➔ The system does not show wrong data
➔ The inspector remains logged in even if shift schedule retrieval is unsuccessful</td></tr>
<tr><td>Success Guarantees</td><td colspan="3">➔ The inspector successfully views his shift schedule
➔ The displayed data is corrected and up to date</td></tr>
<tr><td>Trigger</td><td colspan="3">The logged in inspector clicks on “View Shift Schedule” button</td></tr>
<tr><td rowspan="5">Description (Main Success Scenario)</td><td>Step</td><td colspan="2">Action</td></tr>
<tr><td>1</td><td colspan="2">The logged in inspector clicks on
“View Shift Schedule” button</td></tr>
<tr><td>2</td><td colspan="2">The system retrieves the personal ticket inspector schedule and processes it</td></tr>
<tr><td>3</td><td colspan="2">The data is shown by the system on a calendar model including: dates, times, assigned routes and starting and ending place</td></tr>
<tr><td>4</td><td colspan="2">The inspector sees the schedule</td></tr>
<tr><td rowspan="4">Extension</td><td>Step</td><td colspan="2">Other action</td></tr>
<tr><td>2a</td><td colspan="2">If no shifts are assigned the system displays
“No scheduled shifts available”</td></tr>
<tr><td>2b</td><td colspan="2">If data retrieval fails the system shows
“Error while retrieving data” and suggests retry through an opposite “Retry” button</td></tr>
<tr><td>3a</td><td colspan="2">If schedule is updated in real time the system refreshes the view automatically</td></tr>
<tr><td>Technology & data Variations</td><td colspan="3">If the inspector selects a <u>date filter or time</u>, the system retrieves only shifts for that specific date and time</td></tr>
</table>
