

Use case	View user dashboard/profile	
Release (id)	UC-08, v1.0, 7 May 2026	
Context of Use	A registered user wants to check his active tickets/subscriptions or has to show them to the ticket instructor while on the train, see his past bookings to maybe purchase a similar ticket faster; check the amount of loyalty points he has accumulated through the past journeys to decide how to use them.	
Scope	Allow access for registered users to their profile to see their booking history, active tickets/subscriptions and loyalty points balance.	
Level	Primary task	
Primary actor	Registered User	
StakeHolder & interest	StakeHolder	Interest
	Registered User	Wants access to past purchases, active tickets/subscriptions and loyalty points.
	Customer Service	Needs to verify users' loyalty balances for support.
Preconditions	→ The user is already authenticated (UC2)	
Minimal Guarantees	→ System stays stable → User remains logged in	
Success Guarantees	→ User successfully views their booking history (FR18), active tickets/subscriptions and loyalty status. → User who hasn't purchased any tickets/subscriptions yet sees the areas empty.	
Trigger	Registered user clicks on "My profile" from the homepage menu.	
Description (Main Success Scenario)cl	Step	Action
	1	System displays the User Profile
	2	System displays Active tickets and Subscriptions (FR18)
	3	System displays the Loyalty points Balance (FR20)
	4	System displays Booking history (past purchases) so user can search faster (FR17)
	5	User check their information and chooses what to do next (e.g. searching for a new train or viewing ticket details)
Extension	Step	Other action
	2a	No active tickets: System displays a message: "You have no active tickets"
	3a	No purchases: Loyalty points balance shows "0" (FR19 calculates points based on amount spent)
	4a	No history: The system suggests popular stations instead of historical ones.
Technology & data Variations	Data Calculation: Loyalty points are calculated at a rate of 1 point per 1.00 Euro spent (FR19) Search Integration: Station names from the history (FR17) must be clickable to pre-fill the search form (FR20) Access Control: Customer Service Agents have a restricted "View Only" access to the loyalty balance of the user (FR20)
